Professional Summary

Fourth-year Software Engineering student who builds things that work and writes code others can maintain. Focused on backend systems and API design — from RESTful services to semantic data pipelines — with a solid grasp of OOP, design patterns, and system architecture. Has shipped frontend work in real banking environments and engineered end-to-end NLP-backed systems. Thrives in Agile teams, takes CI/CD seriously, and is looking to contribute meaningfully as a Software Engineering intern.

Education

Egypt University of Informatics (EUI) **New Administrative Capital, Cairo**
Bachelor of Computing and Information Sciences – GPA: 3.0 (B) *Expected 2026*

Experience

Attijariwafa Bank **Cairo, Egypt**
Frontend Developer Intern – Digital Team *Aug 2025 – Oct 2025*

- Developed frontend features for an internal banking portal using modern web technologies and Figma-based design workflows.
- Collaborated with the Digital Team on UI/UX implementation and design system consistency.

Commercial International Bank (CIB) **Cairo, Egypt**
Summer Intern – Digital Banking & AI Applications *Jul 2025*

- Completed an intensive 4-week digital banking program focused on AI applications, fintech innovation, and automated banking systems.

Projects

Semantic Digital Twin Engine | *Python, FastAPI, LangGraph, GraphDB, SPARQL, Google Gemini* **2026**

- Built a real-time supply chain risk detection engine using FastAPI and LangGraph with a GraphDB knowledge base leveraging OWL ontologies and SPARQL inference for semantic reasoning.
- Engineered an NLP pipeline using Google Gemini to extract SLA contract data and transform it into RDF triples; integrated ML-based delay prediction and REST APIs for risk dashboards and alerts.

E-Commerce Ontology System | *OWL, RDF, SPARQL, Protégé, HermiT Reasoner* **2026**

- Designed a full OWL ontology for e-commerce with automated classification via HermiT reasoner and a Natural Language Query interface translating English to SPARQL for non-technical users.

TastyBite – Online Food & Beverage Shop | *HTML, CSS, JavaScript* **2025**

- Built a responsive e-commerce frontend with semantic HTML5, CSS3, and vanilla JavaScript featuring a custom shopping cart with localStorage persistence and client-side form validation.

Technical Skills

Languages: Python, C/C++, C#, Java, JavaScript, SQL, HTML/CSS, Scala
Frameworks & Libraries: FastAPI, .NET (Blazor), React, Pandas, NumPy, LangChain
Databases: PostgreSQL, MongoDB, Neo4j, GraphDB, SPARQL
Web & APIs: REST, GraphQL, SOAP, Middleware, API Management
Software Engineering: OOP, Design Patterns, Data Structures & Algorithms, Agile/Scrum, CI/CD, Software Testing
AI/ML & Data: Supervised & Unsupervised Learning, NLP, Feature Engineering, LLM Integration
Tools: Git/GitHub, Postman, Figma, Protégé, VS Code, Jupyter

Certificates

Sprints × Microsoft Summer Camp – Web Development **Remote**
Certificate Program (40 hours) *September 2025*
